

Nolan Wilson

Wilson, who maintained an impressive GPA while taking a rigorous course load of AP and honors classes, participated in Appoquinimick High School's Natural Pathways Program, which solidified his commitment to pursuing a degree in Marine and Environmental Science.

Appoquinimick High School's Natural Pathways Program is for students who want to develop the professional knowledge and skills needed to conserve, steward, and manage natural resources and the environment. Wilson earned membership in the National Honor Society, and also played on the Varsity Baseball team.

"We are thrilled to award the 2024 Buzzi Scholarship to Nolan Wilson, a member of Appoquinimick High School's Class of 2024," said Skelly Holmbeck, WRA Executive Director.

"Nolan's academic prowess and work ethic shine through in his academic record. His teachers noted his passion for conservation, his integrity, and his service to the community. Nolan is an outstanding student whose intellectual curiosity and dedication to problem solving will bring a fresh perspective to the many water resources challenges we face locally and worldwide."

Nolan will be attending The University of Delaware in the fall, majoring in Marine Biology and Environmental Science.
